

Corus protocols and products

Corus takes a holistic perspective on dental prosthetic treatments in response to the clinician's needs to ensure quality, predictability, differentiation and unparalleled productivity. We have an impact on the patient's dental care experience through exclusive digital solutions based on proprietary innovations. Discover our protocols and products.

Exclusive zirconia solution with a fully validated digital workflow that ensures quality, predictability and high-end aesthetics for a unique and efficient protocol.

Patented immediate loading solution with a fully digital workflow that delivers instant prosthesis loading so your patient can smile from the outset.

Exclusive protocol that combines Instant and Ilum in a unique solution for large implant restorations. One protocol, two products and an unprecedented improvement in predictability and productivity.

Patented digital denture solution with a fully digital workflow. The change you have been waiting for in removable solutions. Unmatched innovation for true predictability and efficiency. Fewer steps, more smiles.

Planned, attractive and efficient invisible orthodontics solution. Predictable timings and results. The first step towards adhesive aesthetics solutions.

Solution for adhesive esthetic restorations in a 100% digital flow. Precise and accessible, natural smiles.

Fully digital nightguard, with exclusive, unique materials and design, for a singular patient experience.

Corus Services

Our purpose is innovation. We pursue excellence in dental health and bring this excellence to you. We want to make your work easier so you can produce smiles with transparency, agility, traceability, commitment and guarantees. Always by your side, in everything.

Proprietary software (Prosthesis Management System) for a new form of communication. Modern dentistry that connects with you and your patient

Innovative and sustainable logistics system. Small packages for big experiences.

Our multidisciplinary team of experts provides support services to help you deliver digital implantology and orthodontic and high-end aesthetics treatments.

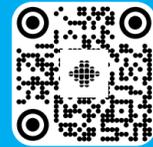

Our business consultant team supports you in taking your clinic to the next level through digitalisation. For a stroke of genius, ask for our input.

Corus Academy

Through training and education, we help our clinicians implement robust and effective protocols and products, and exclusive services. We achieve this through the continuous professional development of our inhouse partners based on customised training plans and by creating synergies with universities and dental companies to improve scientific progress and dissemination.

More than just your digital lab

Welcome to Corus: your partner in modern dentistry. Through innovation, we can work together to have an impact on people's dental health and lives.

We are more than just your digital lab

Corus is the leading European manufacturer of state-of-the-art dental prosthetics. We accompany clinicians in transforming modern dentistry.

Our company does this through product and service differentiation based on innovation, digitalisation and aesthetics. We take a holistic perspective on the patient's dental care experience.
