

Natural esthetics for predictable smiles.

Ilum

The zirconium solution from Corus.
Digital, predictable and exclusive.

The permanent monolithic zirconium solution on natural teeth or implants, produced in a 100% digital workflow.

Benefits:

- Highly aesthetic outcomes.
- Strong biocompatibility.
- Excellent biomechanical properties.
- Top performance from a 100% digital workflow.

One solution, three products:

- **Ilum White**, monolithic zirconium on natural teeth that lets you enjoy all the benefits of a 100% digital material with excellent biocompatibility and aesthetics.
- **Ilum Silver**, monolithic zirconium on implants, perfect for unitary cases or small bridges where it is recommended to use a standard Ti-base, with a more competitive price.
- **Ilum Gold**, monolithic zirconium on implants, ideal for major restorations. Includes a customised interface designed with the utmost precision and adjusted to the optimum biomechanical parameters, to produce the most precise, stable and aesthetic.
